Defne Yapı

45 years with Defne

Defne Construction started its operations in Antalya in 1973 and since then, has produced turnkey construction and restoration works in its tourism investments, pilot project of Southern Antalya Project as well as in other items of various employers.

The wooden products manufacturing department has been established to provide specific detail solutions within the construction works as of 1980 and in 1984, the company has continued its operations independently due to the increasing restoration works.

Between 1984 and 1999, it has completed 13 restoration works in Kaleiçi, Antalya.

As of 2000, it moved its headquarters to Ankara and has completed large-scale decoration and restoration projects of and applications for embassies, residences, university and hotel complexes at home and abroad.

Defne Yapi

Principles of Operation

The Company has 40 to 50 employees in the manufacture department and up to 50 employees in the mounting department based on the size of the work. Each project is taken from design studio and converted into a detailed implementation project by technical staff and the manufacturing process starts following the approval by the project owner.

Mounting is performed under the supervision of our experienced architects or engineers in a number required for the work. In application works, the goal is to complete aesthetically the manufacture in line with the project, the employer's requirements and in accordance with the work program through a high-quality labor.

Defne Construction is a company specialized in public space hard wood works, special productions and moving furniture in both new constructions and restoration works with its technical staff.
